

AMO RIDES

Monthly Newsletter

Volume 1. Issue 1

Our Mission

Welcome to the Amo Rides monthly newsletter! This is our first edition, and we are excited to have you all join us in this venture. As you know, our founders have been working around the clock to start this business and we want to share this experience with you!

Our team consists of Anthony, Bobby, Connor, Jenn, Lyndsey, and Stephen. Each of our owners bring a variety of valuable skills and abilities to this concept.

We are excited for you to share our vision to help our employees, investors,

In this Issue:

- Meet Our Team
- See our Location
- See our Fleet

and shareholders in creating the best experience for our customers. Since we were founded, we look forward to growing our business and finding ways to improve. From our completely electric fleet to our updated facility, we are committed to creating the best possible experience.

This business was founded on a concept that every employee should be able to receive reliable and safe transportation to work. Some perspective employees are unable to obtain and accept jobs due to a lack of transportation. When that worry of transportation is eliminated, businesses and employees can both thrive. Amo Rides is ready to bridge the gap between employee retention and employee transportation.

Our Newly Renovated Space!

Our location is at 461 Graham Road in Cuyahoga Falls, which is centrally located between the various Amazon hubs and warehouses in Northern Ohio.

We have recently installed a Tesla Charging station in our parking lot to increase traffic. This 13,000 SQ FT building holds our fleet and our office space.

Our Eco Fleet

Our amazing fleet consists of Tesla Model Y's, which seat 7, to maximize our ride share experience and reduce our environmental footprint. Each vehicle has a mileage range of 326 per charge, which can accommodate pickups and drops offs to employee homes and Amazon locations.
